## ACADEMIC PROJECTS

- **Marriage Hall Booking System**

  The Marriage Hall Booking System is a comprehensive web-based platform designed to simplify and streamline the process of reserving event spaces for weddings and related occasions. This system caters to the needs of customers, marriage hall owners, and administrators by providing an efficient, user-friendly, and secure environment.

- **Email Spam Detection**

  The Email Spam Detection system is an intelligent and efficient solution designed to identify and filter out unsolicited and potentially harmful emails from users' inboxes. This system employs advanced algorithms and machine learning techniques to analyze email content, sender behavior, and other relevant features, thereby providing a robust defense against spam.
